

Paladyne® ASP™

Next Generation Investment Management Solutions

Paladyne ASP™ is the only fully-integrated hosted solution designed for the global investment management industry.

Fully-Hosted and Managed Technology Infrastructure

Paladyne ASP™ offers firms of all sizes and complexity a managed SAS 70 compliant infrastructure to seamlessly manage their business. Paladyne ASP™ offers a decentralized investment management platform that is accessible from a standard browser anywhere there is an Internet connection. Paladyne ASP™ includes a complete technology infrastructure to run your business and meet investor level compliance and disaster recovery requirements.

Paladyne's hosted infrastructure includes all hardware, software and 3rd party applications required to manage your business. Paladyne ASP™ employs a comprehensive high availability solution that offers global load balancing, clustering, data replication, and virtualization to provide maximum system availability and security.

Business Continuity

Ensuring your Business can be run 24/7

Paladyne understands the importance of managing the mission critical applications you rely on to run your business. Paladyne ASP™ was designed with this in mind and includes the following features:

High Availability—Paladyne's infrastructure offers a fully redundant technology environment that manages server back-up and failover on an automated basis should you experience any issues in your production. Paladyne takes great pride in the design and on-going testing that is required to offer your firm a continuous technology infrastructure with 100% up-time.

Hardware & Software Redundancy— Paladyne ASP™ ensures all critical components of Paladyne's hosted infrastructure offer full redundancy to eliminate any single point of failure and ensure your environment is available when you need it.

Scalability—Paladyne's hosted technology employs the latest technology to ensure all components of Paladyne ASP™ are clustered, ensuring that you have the needed resources and expected response time to manage your business in real-time.

Managed System Maintenance and Monitoring

Complete Outsourced IT Support

Many firms today do not have the resources, time, or knowledge to perform the regular maintenance needed to ensure optimal performance. Paladyne ASP™ offers you a dedicated support staff to manage all of your IT needs.

Paladyne Global Offices

Europe, Middle East, Africa

1 Duddell Street, 18th Floor,
Central, Hong Kong
Telephone: 852-3695-5128

On-going System Monitoring and Maintenance— As your system and business requirements change Paladyne manages any on-going technology requirements and maintenance needed to run your business efficiently eliminating the need for internal IT support.

Upgrade Services— Paladyne ASP™ offers scheduled and monitored upgrade services that are completed in a dedicated environment separate from your production environment ensuring that there is no interruption to service during the upgrade process. All upgrades are deployed in a dedicated QA environment where you can test and validate functionality before moving to production..

“Hot-Site” Disaster and Recovery Back-Up

Fully-Managed Disaster Recovery and Scheduled Back-ups

Paladyne recognizes your firm cannot afford a momentary interruption to the tools you rely on to run your business. Paladyne’s “hot-site” disaster recovery solution offers geographically separate client environments to protect against natural disasters, network or power outages, or any unforeseen technology issues. Our multiple data centers offer a complete self-contained mirrored environment so that clients, if needed, can be dynamically migrated to another data center. This “hot-site” disaster and recovery back-up ability ensures that clients can seamlessly resume their business regardless of circumstance.

IT Requirement	Paladyne ASP™
All hardware, software and 3rd party applications required to run your business	X
